- » Thomas Jefferson University's Plant Modernization

Single Source Mechanical Construction Solutions. From an Experience, Trusted Expert.

EMCOR Services Fluidics is your single source for a complete range of mechanical and facilities services, including HVAC equipment repair and replacement, preventive and predictive maintenance, and facilities operations. With 45+ years of experience and the solid financial strength that comes from being a wholly-owned subsidiary of EMCOR Group, Inc., Fluidics provides a wide variety of customized solutions to meet clients' most demanding requirements.

Fluidics' mechanical construction services include commercial HVAC maintenance and repair, commercial plumbing, specialty process piping systems fabrication and installation, and custom sheet metal welding. Through diversification and prudent risk-taking, Fluidics' team of design professionals, engineers, cost estimators, and project managers work diligently to complete projects on time and on budget.

Technology-enabled Mechanical Services. For Complete Optimization.

Our specialists use state-of-the-art tools such as "Quick-Pen" and the latest CAD technologies to fully support estimators, project managers, foreman, and field staff. Sophisticated project management software, networked to optimize swift and accurate communications, helps ensure work quality and integrity.

On-Time, On-Budget Service. Without Compromise.

Regardless of whether projects are large or small in nature, Fluidics routinely completes them on time and within budget. We have the ability to work with general contractors, construction managers or directly for the facility's owner. Pre-fabrication of piping on large projects in our environmentally controlled shop adds efficiency and quality.
